

Cheng Porchheng

Software Developer

About Me

A motivated Junior Backend Developer with a software engineering background and real-world experience in server-side programming, having built and deployed production-grade API for a mobile e-commerce platform.

Skills

- **Programming:** TypeScript, Dart, Python, C++, Java, JavaScript, SQL.
- **Framework:** NestJS, Vendure, Fast-API, Nodes, NextJS, Flutter, Angular.
- **Tools & Platforms:** Git, Docker, Postgres, Postman, Jira, GraphQL.
- **Cloud/DevOps:** AWS CloudWatch, Firebase (FCM), Redis, Cloudflare, Digital Ocean.
- **FinTech:** KHQR Integration, Payment Gateways (ABA).
- **Soft skills:** Communication, Problem-Solving, Adaptability.

Educations

Cambodia Academy of Digital Technology (CADT)

- Bachelor: Computer Science
- Specialization: Software Engineering
- Expected Graduation: 2023 - 2026

Experiences

Backend Developer Intern

Biz Solution Co, Ltd.

Jan 2026 - Present

- **Developed and customized RESTful and GraphQL APIs** using the Vendure framework to power Easy Eazy, a Khmer-language multi-vendor mobile e-commerce platform.
- **Integrated KHQR payment gateway with ABA Bank**, implementing secure transaction flows and automated payment status webhooks for seamless customer checkouts.
- **Extended Vendure Admin Panel capabilities** by implementing custom **GraphQL** mutations and queries, improving internal data management efficiency.
- **Engineered a notification system using Firebase Cloud Messaging (FCM)**, enabling real-time transactional alerts and promotional pushes across mobile platforms.
- Implemented **Redis distributed caching** and **AWS CloudWatch monitoring**, significantly reducing API latency and ensuring system reliability.

API & Web Developer Intern

The Council for the Development of Cambodia (CDC)

May 2025 - Aug 2025

- **Engineered a robust NestJS REST API** to serve as the centralized backend for a **cross-platform** Meeting Scheduling System.
- **Architected multi-client support for NextJS** web portals and mobile apps, ensuring seamless **data synchronization** across all interfaces.
- **Developed a real-time NextJS Web Portal** optimized for office-wide LCD displays, providing instant scheduling updates via live data integration.

Certifications

- [Introduction to Cyber security | CISCO NETWORKING ACADEMY](#)
- [CyberOps Associate | CISCO NETWORKING ACADEMY](#)
- [Cybersecurity Essentials | CISCO NETWORKING ACADEMY](#)
- [Solid Edge Mechanical – Associate Level Certification](#)

Languages

- Khmer (Native)
- English (Advanced)
- Japanese (Beginner)

Projects

Micro-services & Back-end Developer

Post-Quantum Cryptography Messenger App Oct 2025 – Dec 2025

- **Engineered** a secure chat application **backend**, integrating a **polyglot microservices** architecture (**NestJS, Python FastAPI**) to implement **ML-KEM (Kyber)** for Post-Quantum **E2EE** key exchange and user management.
- **Demonstrated** the security value by performing a comparative security analysis, showing **ML-KEM's** fundamental algorithmic hardness and superior performance metrics compared to classical **RSA** encryption.
- **Implemented NIST FIPS 203 (ML-KEM/Kyber)**, leveraging a dedicated, high-performance **FastAPI** microservice for all quantum-resistant key **encapsulation** and session key exchange.

Researcher Fellowship

Angkor Social Innovation Park Apr 2024 - Jun 2024

- Authored a comprehensive 15-page research paper analyzing the **impact of Blockchain technology on Cambodia's digital payment system**, demonstrating in-depth research and analytical skills.
- Conducted a **systematic literature review** of over 20 research papers in blockchain, identifying key trends and challenges to inform strategic insights.
- Developed **insights** and understanding of conceptual framework for Bakong's blockchain, providing actionable recommendations for enhancing scalability and security in digital payment systems.
